MEMORANDUM
Department of the Navy

Date: 5 Mar 91
From: LCDR PAINTER
To: Attendees

Subj: N7/SEABEE DEMOBILIZATION MEETING

1. A general meeting to review mission/tasking for NLSF Seabees was held 28 Feb with the below listed attendees.
2. MCMGRU Abu Dhabi: Camp buildup complete including sprung. Reduce size of PW Seabee Det to operating maintenance size. Potential requirement to pull down sprung on demobe. Probable continued MCM effort in gulf, whether or not based here and for how long indeterminate.
3. FLSS Jeddah: Probable function for one Red Sea airhead to support transit CBGs, not sure which one. Religious significance of Jeddah may require closures during Ramadan/the Haj. As at MCM, Seabee build up about done, can pull down to maintenance size. Still have firefighting problem. Decision on power is to rent generators, new transformer/switchgear not cost effective.
4. Flehosp 5: Will bring home Det as soon as LT Globokar is done, probably within a week. Need to schedule removal of sprung. Hospital retrograde still in the air.
5. Flehosp 6: Again, somewhat in the air. Question about relocating next door. Can we use K-spans? Go ahead and buy kitchen equipment for (2). PW det is 80 Seabees, were mobilized 1 Jan, will be looking for work in about a month. May be source of Subic backfill.
6. N7/embassy: Unsure of residual presence, location (Bahrain/UAE). Small core/staff civil reqt. Would like to transition to trouble call work being handled through PW, would still need some sort of N7/ACE liaison.
7. Public Works, ASU: Foresee transportation, especially of retrograding troops, to be a major player for several months. This will particularly tax big bus\$ workload. Will also have a mission to identify and receive back all vehicle assets, prepare for storage. Unknown amount of work in demobe of 47th Field Hosp. PW will handle determination of remaining scope of project work, as well as personnel structure req'd for demobe.
8. Doha, Qatar: Leave LCDR Opitz in place for now.
9. Sprung Buildings: Currently erecting 30x120 at Half Moon Bay. Uncertain if any remaining bldgs will be erected, especially at originally planned locations. May have reqt to take some down, such as those at Flehosp 5, MCM, and 1/2 Moon.
10. AV Unit: Spacemakers owned by ASU. Discussed possible storage locations such as ASU "lower 13". No firm decision.

Lessons learned - NT coordinates

- R.E. leaning
- berthing
- sample passed out
- 50/60 cycle 120/220v problems
- reserve pay/move problems
- emergency leave - older, pers. affairs
- Lack of eng's plan / fac'y support plan
- spool up Seabees
- intra-theater transport
- set up Mini Roicc / GOS
- NAVCONT augment - CEC/CB - also CAMM pool -
- ESU - eng's support unit TASK ORIENTATION
- EOD / ABFSC, Pier repair -
- why reserve allowance vice active?
- Advanced P&E
- " nat'l's - Sprengs / K-spans.
- Host country agreements - HNS ^{Support}
- Know rules ^{of} _{the} ^{area} _{of} ^{operation}
- Remember the Good Stuff -
- GOS ~~was~~ speed was great, need "bochs" to monitor.
- Warranting
- Keep NT - augment - staff civil
- Oplan - 1002. rewrite -

next week

5 Mar

Good items
↳ spotting up AT via AT4 was well done

Engs must know of law
to be able to do planning if then react

Poor input for users

integrate - Active res need day to day

Reserves plan the war

belong to sponsor, not res for

no RACOM function - need database of

assets

matls

equip

leasing

hospital - no organic capability for

H₂O & sewage

No site prep planning

demobe hospital?

RCCLOS - application

11. Prepositioning: As w/AV Unit item above, general discussion on prepo issue. Inconclusive at this time.
